Repositioning for Q4 2026

Sold or reduced positions (-5.0%)

- Sold S&P Global
- Trimmed JP Morgan
- Trimmed Mitsubishi UFJ
- Trimmed Alphabet
- Trimmed Thermo Fisher

Bought or increased positions (+5.0%)

- Initiated a new position in XLI ETF
- Initiated a new position in IDEXX Laboratories
- Increased Microsoft
- Increased Berkshire

Rationale:

We are not making any asset mix changes this quarter and continue to be overweight equities and underweight fixed income. There was also no change in the Canadian equity component. On the global equity component:

Financial:

- Crystallized gains in JP Morgan and Mitsubishi UFJ Financial Group based on valuation.
- Exited S&P Global based on quality concerns over the impact of AI on a portion of its business. S&P Global is a global provider of credit ratings, benchmarks, data & analytics, and workflow solutions.
- Berkshire Hathaway was added based on quality, valuation and diversification of earnings within the financial sector.

Information Technology / Communication Services:

- Alphabet, one of the largest holdings, was trimmed to manage total sector exposures while taking profits (the stock has returned over 9% year-to-date).
- Increased Microsoft where the risk/return profile is more attractive.

Health Care:

- IDEXX Laboratories was initiated, partly funded by trimming Thermo Fisher Scientific as the end market recovery is underway and now more fully reflected in the valuation.
- IDEXX is a global leader in pet healthcare innovation. It develops, manufactures and distributes products and services for the veterinary companion animal, livestock, poultry, water testing and dairy markets.

Liquidity / Industrials exposure:

- XLI is an Industrials ETF that owns large-cap US industrials stocks. XLI was introduced to preserve Industrials exposure in a liquid vehicle.
